

NEXT-GEN POST ACUTE CARE MANAGEMENT SOLUTION:

More Effective and More Efficient

KEY CHALLENGES IN POST-ACUTE CARE CONTRIBUTING TO HIGHER COST OF CARE

likelihood of hospital readmission within 30 days for Medicare patients discharged to a SNF

of those readmissions are avoidable

READMISSIONS COMMONLY CAUSED BY

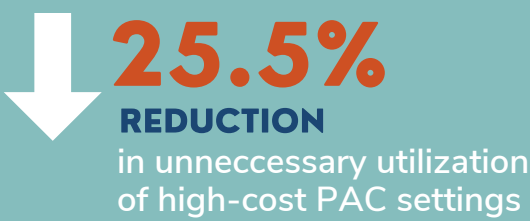

- Lack of proper discharge planning and care transition between acute and post-acute care
- Insufficient real-time insights to proactively manage high risk-patients

Acquisition of patient information to meaningfully intervene and manage length of stay and reduce avoidable readmission rates is critical to improving quality of care and lowering total cost of care.

THE SOLUTION

REDUCE TOTAL COST OF CARE, AVOID PENALTIES AND IMPROVE EFFICIENCIES.

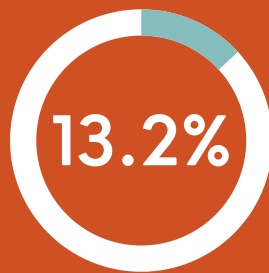

Post Acute Analytics optimizes the post-acute care provider network making implementation simpler and closing communication gaps throughout the care continuum.

ALIGNED INCENTIVES: HIGHEST VALUE DELIVERED AT THE LOWEST COST

\$0 IMPLEMENTATION COST

100% OF FEES AT RISK

REDUCTION IN TOTAL COST OF CARE

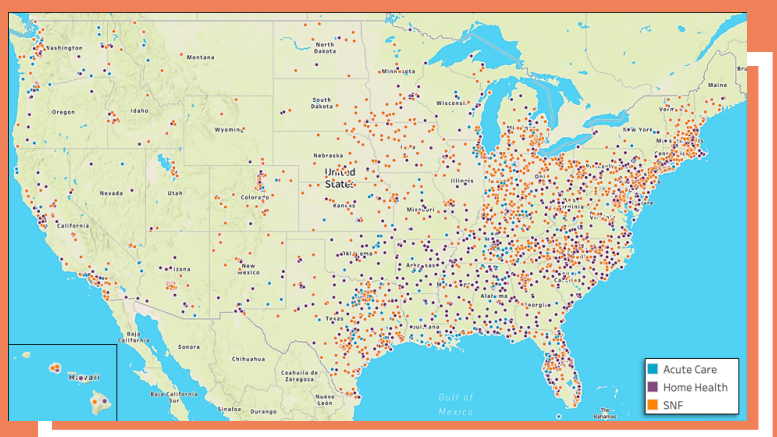

CONSISTENTLY DELIVERED TO CURRENT CLIENTS

LEVERAGING A SOLUTION LIKE POST ACUTE ANALYTICS, ALLOWS PAYORS AND PROVIDERS TO EXPERIENCE:

91% of patients admitted to post-acute care receive real time alerts

\$27PMPM savings per episode of care

2.4x increase in utilization management and care coordination efficiencies

POST ACUTE ANALYTICS ACHIEVES THIS WITH REAL-TIME CONNECTIVITY TO ACUTE AND POST-ACUTE CARE PROVIDER EMRS.

Post Acute Analytics provides a full suite of solutions that empower our clients to positively impact the Total Quality and Cost of Care.

Through proprietary analytics, turnkey integration engine, and medical leadership, our solutions ensure that providers and payors can make real-time decisions that improve patient outcomes while reducing total cost of care.
