

CLINICAL CONSULTING SERVICES

Increase ROI and Anna™ User Adoption with PAA's Clinical Consulting Services

Who is PAA?

Post Acute Analytics is a next generation post acute management solution that helps increase medical cost savings, lowers administrative burden, and improves provider and patient satisfaction.

Clinical Consulting Increases ROI

Bringing over 30 years of combined UM experience, our transitions of care experts partner with client clinical decision makers to deliver high-quality care management to their patients efficiently and cost-effectively.

- Examining existing processes
- Detecting inefficiencies
- Advising on industry best practice solutions
- Application of CMS Chapter 8 Criteria

Inappropriate Authorizations

“In 10 years, I have never seen so much support, commitment, or dedication when rolling out a new platform. PAA clinical consulting team made us feel so comfortable and heard right away.”
~ UM Associate Manager

5 Reasons Why Clinical Consulting Works

1. Proven track record of developing and implementing UM industry best practices including customized education and materials that increase adoption.
2. Knowledge-base of post-acute care barriers and solutions to overcome.
3. Promote connection between Anna™ tasks and corresponding workflow efficiencies.
4. Proactive care management to ensure interdisciplinary alignment and establishing consistent expectations.
5. Education on application of CMS guidelines in decision making so that the patient is receiving the right amount of care in the right setting.

CLINICAL DISCOVERY & TIERS

Which Tier Is Right For you?

Clinical Discovery Process

PAA's Clinical Consulting team will perform an in-depth discovery of clinical workflows to identify areas for optimization and deliver a customized clinical roadmap which may include:

1:1 Rounds Calls: Advise clients on patients clinical reviews in real time.

Customized 1:1 Coaching: Strategies to support valuable patient engagement, best practices to address difficult discharge barriers and solutioning. Based on individual needs such as support for successful collaboration with the SNF team.

Discovery Sessions: Perform observation of care navigator's day and provide recommendations for workflow efficiencies.

Clinical Inbox: Direct communication with Anna™ Clinical Consultants for case specific guidance referencing CMS Ch. 8 Criteria.

Education: Providing clinical documentation to increase knowledge and awareness of a topic or pain point in utilization management.
