

# Transforming Post Acute Care with AI Driven Solutions

Post Acute Analytics (PAA) is a next generation Post Acute Care (PAC) Management solution for automating post acute prior authorization and concurrent review.

## Partnering with PAA

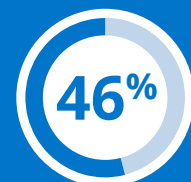

PAA reduces the administrative burden placed on health plans and health systems while ensuring that their members have a positive experience and improved outcomes. Our clients and partnerships are built on two pillars of success consisting of our ANNA™ technology and clinical expertise.

- Real-time Clinical Data
- Manage by Exception Workflow
- At-Risk Patient Alerts
- Experienced Clinical Consultants

Savings in Medical Spend

Administrative Savings

## Reduce Costs and Improve Outcomes

PAA takes the the administrative burden placed on the provider community and the payors while ensuring the members are having a positive experience and good outcomes.
